BRISBANE / MELBOURNE

Service Industries

J&G Trading are importers and distributors of quality stainless steel & galvanised marine hardware, wire ropes, swage presses and stainless steel handrail components. Located in Brisbane, Queensland and Dandenong South, Victoria, we service many industries both locally and nationally, including:

- Chandleries
 - Industrial Rigging & Lifting
 - Fasteners and Engineering Supplies
 - Balustrading Supplies
 - Fruit Growers
 - Shade Sail Manufacturers
 - Fishing Industry
 - Mining Industry
-

OUR MISSION

To provide excellence in customer service through the delivery of superior quality products, J & G Trading aims to lead through price competitiveness, innovation and integrity.

OUR PRODUCTS

Over 1500 stock product lines across a range of categories

In-house swaging, fabrication & assembly facilities

Strategic overseas alliances to provide the latest in global product trends

OUR FACILITIES

Showrooms, sales offices and warehouses in Brisbane & Melbourne

Extensive distributor network throughout Australia & New Zealand

Interactive website with all current products displayed

How to Use This Catalogue

This catalogue has been created to aid in product selection, provide detailed product specifications, and assist with your ordering process. The information contained herein is subject to change without prior notice, and should not be used as an infallible guide to specifications.

Should you require further assistance or information on any of these products, please contact the supplier listed on the back of this catalogue.

All dimensions are in millimeters unless otherwise specified. The following is a list of abbreviated terms as contained in this catalogue:

- **B/S** Minimum Breaking Strain (Kg)
- **TDL** Total Deformation Load (Kg)
- **AISI 304** 304 Grade Stainless Steel
- **RWL** Recommended Working Load (Kg)
- **Wgt** Weight of an item (g or Kg)
- **AISI 316** 316 Grade Stainless Steel

Catalogue Sections

- Wire Rope

- S/Steel Hardware

- Galvanised Hardware

- Marine Hardware

- S/Steel Protectants

- Fasteners

- Specialised Tools

How to Order

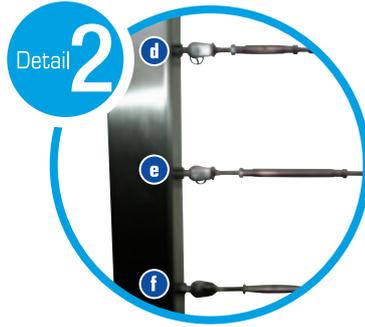

Contact the supplier listed on the back of this catalogue for further information on how to order these products. Please note that pricing, delivery charges, terms of payment and returns policies are set by the supplier listed on the back of this catalogue and also in the J & G Trading Product Pricelist.

Detail 5

- l** Eye Screw + Mini Rigging Screw (J+S) 5mm
- m** Internal Threaded Terminal + Button Cap Screw
- n** Threaded Terminal + Nylon Bush

Detail 6

- o** Threaded Terminal + Tensioner
- p** Eye Bolt + Rigging Screw (T+S) 6mm
- q** Saddle + Turnbuckle (J+J) + Thimble + Ferrule

STAINLESS STEEL PROPERTIES

Stainless Steel Composition

Stainless Steel is an alloy that contains at least 50% iron and 10% chromium. The chromium slows down the corrosion process and plays a key part in defining stainless steel. Generally the higher the chromium percentage (up to 30%) the more corrosion resistance. Other elements are also added to enhance the properties of a particular grade and type of stainless steel.

Stainless Steel Grades

Stainless Steel alloys are grouped according to the structure of their crystals. Adding nickel creates the structure used in marine applications, called **austenitic**. Austenitic stainless steels are identified by their '300' series designation.

Grade '304' is used for rigging, fasteners, fittings, and propeller shafts. This grade is made up of 18% chromium and 8% nickel offering good corrosion resistance. Type 304 is the most common stainless steel produced, and satisfies a broad demand for adequate performance at an affordable price. Type 304 is inadequate for many marine applications.

Grade '316' offers the best corrosion resistance among standard stainless steels. Type 316 is made by adding more nickel and 2% molybdenum to Grade 304. It resists pitting and corrosion by most chemicals, and is particularly resistant to salt water corrosion, making it ideal for most marine applications. Type 316 is only about 85% as strong as Type 304.

Corrosion Definition

When stainless steel is produced, the chromium forms an outer oxide layer. As long as this layer remains intact, the stainless steel remains passive. Once the oxide layer begins to break down, the stainless steel becomes active and its corrosion resistance is reduced. Rust is the obvious, visible evidence of corrosive activity.

Grade '316'
Stainless Steel
for marine
applications

When used properly, stainless steel enjoys a strong and enduring reputation for visual appeal and structural integrity in a wide range of applications and environments.

Stainless Steel ‘Tea Staining’

Incorrect specification, fabrication or subsequent handling in coastal environments may cause stainless steel to stain or discolour, impairing the overall look. This brown discolouration, or tea staining has been identified in coastal applications in Australia and overseas.

Tea staining mostly occurs within about five kilometres of the beachfront, or a few hundred metres from a sheltered bay and worsens closer to the marine source. Other environmental factors may contribute to the problem such as wind exposure, industrial pollution, and elevated temperatures where tea staining may occur up to 20 kilometres from the sea. Tea staining can be controlled. It does not affect the structural integrity or the longevity of the material.

Design, Fabrication and Handling

Poor design and fabrication can lead to tea staining or more serious corrosion of stainless steels. In the design stage, it is advised to avoid crevices such as intermittent welds and areas where water can collect. During the fabrication process, it is advised to avoid carbon steel contamination.

Choose a smoother surface

Rough surface finishes promote tea staining. The main cause of this problem is salt deposited on the stainless steel surface. The smoother the surface the better. To reduce the risk of tea staining **choosing** or **creating** a smoother surface is an ideal combatant. Smoother surface finishes stay cleaner between washes and don't have deep surface grooves where chlorides and other contaminants can collect and concentrate.

A process called **pickling** may be used to remove surface contaminants, but may dull the surface. Alternately **electro polishing** may be used, and has the added benefit of brightening the surface.

Specify Grade ‘316’ Stainless Steel

As outlined in the previous section, Grade 316 is ideal for marine and highly corrosive environments. Regular maintenance and use of lanolin protective products will ensure the best resistance against tea staining and corrosive effects.

Maintenance and Protection

Even smooth stainless steel finishes in coastal environments may show tea staining if not washed regularly. Rain washing the stainless steel surface can help reduce tea staining, and should therefore be an important project design consideration. Best results are achieved by washing with soap or mild detergent and warm water followed by rinsing with clean cold water. Surface appearance may be further improved by wiping dry the washed surface and treating the stainless steel with **Inox** or **Polinox** Protective range. More information on these ranges can be found in this catalogue on pages 53-55.

WIRE ROPE 1X19 CONSTRUCTION AISI 316 (MARINE GRADE)

- Smooth finish wire, high tensile strength, limited flexibility and stretch
- Suits applications where wire will not be subject to bending stresses
- Use with standing rigging, mast stays, swage fittings in balustrading
- Highest resistance to tea staining

Inox Protective Products

J & G Trading are proud providers of Inox quality products. Inox is a quality product designed for heavy industrial use and where extreme climatic conditions prevail. Inox contains no silicon, acid, dieselene or kerosene. Inox will not harm metal points, surfaces, plastics, paints, enamels or finishes, fibreglass, formica or neoprene seals. Inox does not dry out, gum up, become gooey or sticky or **wash off with water!**

Inox is non-conductive, non-static, non-toxic, non-corrosive and non-staining.

Lanolin is a natural wax found in animal wool, especially the wool from sheep, commonly referred to as 'wool fat' or 'wool grease', it has wide spread uses. Lanolin adheres tenaciously to most surfaces providing a defensive shield that protects the treated surface from corrosion or oxidation.

LANOX HEAVY DUTY MX4 ANTI-CORROSION LANOLIN LUBRICANT

- Heavy duty anti-moisture, anti-corrosion lubricant made with a high grade lubricating oil and lanolin base with specialised chemical compounds
- Contains no silicon, kerosene, acids or dieselene
- Does not become sticky, gooey or gum up. Does not dry out or wash off with water
- Non-conductive, non-static, non-corrosive and has low flammability (non-aerosol)

Code	Size
INOX-300	300g Aerosol
INOX-5000	5L
INOX-20000	20L

LANOX MX4 SUPERIOR ANTI-CORROSION LANOLIN GREASE

- Non-toxic, food grade approved lanolin grease
- Can be used as an anti-seize for bolts, nuts and threaded rod
- Prevents electrolysis between dissimilar metals
- Non-carcinogenic, bio-degradable, highly resistant to salt and acid corrosion and provides lasting protection
- Environmentally and user friendly

Code	Size
INOX-G-500	500g Tub
INOX-G-2500	2.5kg Tub

INOX MX5 PLUS EXTREME PRESSURE LIQUID LUBRICANT WITH PTFE

PTFE is a premium grade extreme pressure anti-friction medium which provides increased lubrication ability between the surfaces

- Will not become tacky, alter surface tolerances, dry out or wash off with water
- Non-toxic, non-conductive, non-corrosive and non-staining
- May affect some natural rubber products with continual long term use

Code	Size
INOX-P-300	300g Aerosol

INOX MX7 EXTREME PRESSURE PTFE PASTE

- Specifically formulated for ultra extreme pressure lubrication and where tough thread anti-seize applications are required
- Contains anti-corrosion additives

Code	Size
INOX-L-125	125g Tube

STAINLESS STEEL PROTECTION

Poligrat Surface Finishing Products

The unique Polinox range of surface finishing products employs the latest in German technology to bring our customers a range of surface cleaners and stain removers for stainless steel. To aid in product selection for your particular job, please read the following information. For chemical composition and MSDS please contact us for more information.

1. Polinox-US Rust & Stain Remover

Rust and stain remover for efficient treatment of contaminated stainless steel. Discolouration is removed and full corrosion resistance is restored. Original surface polish is not compromised.

Application

- Do not apply in direct sunlight
- Apply undiluted by spray, brush or roller
- Leave for 30 mins to 1 hour depending on severity
- Rinse off with water
- This paste is corrosive, gloves, protective clothing and goggles must be worn

Uses

Commercial & domestic balustrading, architectural features, yacht bowrails & fittings, handrails.

2. Polinox-C Cleaner & Restorer

Acidic cleaner to degrease, clean and remove surface rust. Especially effective at removing water marks. Passivates the surface thereby increasing corrosion resistance. Original surface polish is not compromised.

Application

- Apply undiluted by brush, roller, cloth or spray unit
- Temperature of surface should be 5 to 30 degrees
- Leave for 15 to 45mins
- Water rinse off
- This liquid is poison, protective clothing and gloves must be worn.

Uses

Handrails, tanks & pipework for food/wine/dairy industry etc, transportation vehicles such as trucks & trains.

3. Polinox-CSG Cleanox

Cleans and preserves surfaces which have been polished ground or glass bead treated. Makes surface less susceptible to fingerprints and prevents fingerprints reappearing. Minimises cleaning and care of decorative stainless, especially around handles. Provides uniform surface finish on all metals.

Application

- Apply undiluted by immersion, spraying or wiping
- After drying CLEANOX leaves a thin protective coating preventing soiling
- No need to rinse or wash off

Uses

Benchtops and splashbacks, kitchen appliances, handrails, door handles, display areas.

Poligrat
Stainless Steel
Protectants &
Cleaners

POLINOX-US STAINLESS STEEL RUST & STAIN REMOVER

- Cleans and removes rust and stains, such as tea staining
- Surface retains original polish after application
- Please contact us for more information and MSDS
- Alternate sizes available on request

Code Size

P-157-0020	200ml
P-157-0100	1 Litre

Removes tea staining

POLINOX-C STAINLESS STEEL CLEANER & RESTORER

- Cleans grime, salt deposits & surface contamination from s/steel
- Gives a metallic finish to s/steel
- Please contact us for more information and MSDS
- Alternate sizes available on request

Code Size

P-158-0010	1 Litre
P-158-0011	5 Litre

Cleans stainless steel

POLINOX-CSG CLEANOX STAINLESS STEEL CLEANER

- Cleans & prevents finger prints and provides extra protection against staining on s/steel
- Provides a uniform surface finish to handrails etc
- Leaves a thin protective layer to prevent further soiling
- Please contact us for more information and MSDS
- Alternate sizes available on request

Code Size

P-162-200	200ml
P-162-1000	1 Litre

HEALTH HAZARD INFORMATION
Acute Health Effects:
 Irritating to eyes, respiratory system and skin.
 Corrosive Health Effects:
 Cumulative effects may result following exposure*
 * (limited evidence)

FIRST AID
Swallowed:
 Give milk or water (if conscious) URGENT MEDICAL ATTENTION.
Eye:
 Wash with running water (15 mins). Medical attention.
Skin:
 Flood body with water. Remove contaminated clothing. Wash with water & soap. MEDICAL ATTENTION.
Inhalation:
 Fresh air. Rest, keep warm. If breathing shallow, give oxygen. Medical attention.

ADVICE TO DOCTOR
 Airway problems 100% O2. Treat burns as thermal. Retract eyelids - irrigate 30 mins.

 Acid

HEALTH HAZARD INFORMATION
Acute Health Effects:
 Causes burns
 Risk of surface damage to eyes.
 Harmful by inhalation, in contact with skin and if swallowed.
 Can be absorbed through skin.

FIRST AID
Swallowed:
 Contact doctor or Poisons Centre.
 Give glass of water.
 Rinse mouth with plenty of water.
Eye:
 Wash with running water (15 mins). Medical attention.
Skin:
 Remove contaminated clothing. Flood with water. Apply CALCIUM gel. Give CALCIUM tablets.
Medical Attention:
 Inhalation:
 Fresh air. Rest, keep warm.

ADVICE TO DOCTOR
 Airway problems 100% O2. Treat burns as thermal. Retract eyelids - irrigate 30 mins.

Issue Date: 29/7/2002 Print Date: 9/12/2003 Copyright ChemWatch +613 9572 4700.

Please obtain and read MSDS before using poligrat products

WORK-PRACTICE DATA SHEET - THIS IS A SUMMARY ONLY - FULL REPORT AVAILABLE

CSG CLEANOX
 ChemWatch 4918-24
 HAZARDOUS ACCORDING TO WORKSAFE CRITERIA
 Company Contact No. (+61 3) 9775 1620

INGREDIENTS
 Liquid hydrocarbons
 barium compound
 Glycol derivative

PROPERTIES
 Liquid
 Does not mix with water.
 Flashes on water.

HEALTH HAZARD INFORMATION
Acute Health Effects:
 HARMFUL - May cause lung damage if swallowed.
 Vapours may cause dizziness or suffocation.
 Inhalation and/or ingestion may produce health damage*
 * (limited evidence)
 May produce discomfort of the eyes, respiratory tract and skin.
 Vapours potentially cause drowsiness and dizziness*
 * (limited evidence)
Chronic Health Effects:
 Cumulative effects may result following exposure*
 * (limited evidence)

FIRST AID
Swallowed:
 Contact doctor or Poisons Centre.
 Give glass of water.
Eye:
 Wash with running water (15 mins). Medical attention.
Skin:
 Remove contaminated clothing. Wash with water and soap.
Inhalation:
 Fresh air. Rest, keep warm. If breathing shallow, give oxygen. Medical attention.

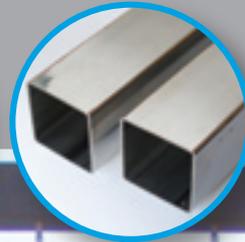

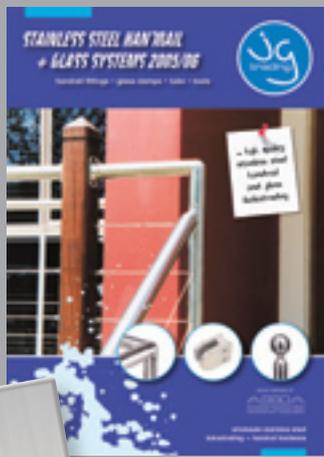

ADVICE TO DOCTOR
 Evaluate for respiratory distress. Consider lavage with cuffed tube. NO intubation.

NOT REGULATED UNDER LIN CODE FOR TRANSPORT OF DANGEROUS GOODS

PRECAUTIONS FOR USE
Engineering Controls:
 General Exhaust Ventilation adequate.
Glasses:
 Chemical goggles.
Gloves:
 Nitrile.
 Polyethylene.
Respirator:
 Type A-P Filter of sufficient capacity
Flammability:
 Combustible.

SAFE HANDLING INFORMATION
Storage & Transport:
 Keep container tightly closed.
 Keep container in a well ventilated place.
 Keep away from food, drink and animal feeding stuffs.
 Store in cool, dry, protected area.
Spills & Disposal:
 Absorb with dry agent.
 Stop leak if safe to do so.
 Take off immediately all contaminated clothing. To clean the floor and all objects contaminated by this material, use water and detergent.
Fire/Explosion Hazard:
 Toxic smoke/fumes in a fire.
Fire Fighting:
 Foam.
